# Year 5 Spring 2 Learning Log Ideas:

1) Go on a minibeast hunt and record what you see. Could you create a tally chart or a bar chart?

Can you find:

-a worm after a Spring shower?

-a bee looking for nectar?

- a ladybird exploring the grass?

- a slimy snail in a dark, damp spot?

2) Make a loo roll bird feeder:

i) Smother a cardboard tube with peanut butter (no added salt and sugar versions are best for birds).

ii) Roll it in bird seed and thread some string through the hole.

iii) Tie it up in your garden where birds will feel safe eating it.

How many birds will you spot? Can you find out the names of the different types?

3) Make natural art using items such as fallen leaves, petals and sticks. You could even try using the objects as 'stampers' or paintbrushes – dipping them in painting and rolling, brushing or stamping them on paper to create interesting patterns and effects.

4) Create an interactive water cycle diagram, to bring the movement of water to life. Use a large sheet of paper with movable elements such as:
*blue cellophane strips for rain and rivers
*cotton wool for clouds
*small, plastic cup for lakes and oceans
*arrows that can be moved to show how water moves

5) The UK is home to over 1,500 rivers, each with its unique characteristics and significance. Find out the names of as many UK rivers as possible, then list them alphabetically.
